Residential Chlorinators

*Pure Pool Water Easy
as a Breeze.*

- Clear Cell Housing for Easy Inspection
- Simple Installation and Operation
- Broad Salinity Range (3,000-35,000 ppm)
- Easy to Clean Breeze Cell
- Five Year Residential Warranty

SGS
Saline Generating Systems

BREEZE

Residential Chlorinators

The Breeze Chlorine Generator is available in three sizes for residential pools, depending on gallonage and the sanitization requirements of the pool.

Residential Unit Sizing Chart

	Breeze 320	Breeze 540	Breeze 760
Maximum Pool Size (Gallons)	20,000*	40,000*	60,000*
Production	0.78 lbs. per day	1.35 lbs. per day	1.88 lbs. per day

* Correct sizing of a chlorine generator is subject to the specifications of each body of water, and should be carefully evaluated for best results. Where heightened chlorine demand exists due to warmer climates, humidity, high bather load, water features and other environmental factors, the maximum pool size should be reduced by at least 30%.

Clear Cell Housing

Electrodes are completely visible, making cell inspection simple, even when the system is operating.

Residential Control Center

Engineered to operate in extreme conditions, the Breeze Control Center offers true current limiting, which is designed to extend the life of the cell.

Superior Cell Design

The Breeze cell is independent of the clear cell housing; cleaning is accomplished in a couple of minutes with the 'ARD'. NO NEED TO CLEAN THE CELL WITH ACID!

5 Year Residential Warranty

SGS warrants the Breeze Control Center and Cell for 3 Years full parts and labor; years 4 and 5 are pro rated parts at 40% and 60% of MSRP.

Certified to NSF/ANSI Standard 99

Saline Generating Systems are MADE IN USA with quality for durable service and ease of operation. To learn more call us toll-free or view our entire line of residential and commercial products for pool & spa maintenance online at:
